

Ducted Gas Heating

The effective way
to heat your home

brivis

Did you know?

With Brivis Zoning technology you can heat any area in your home. You can even heat just a single room, saving you money on your energy bill.

Fast

It doesn't matter what the temperature is outside, your Brivis Ducted Gas Heater will warm up your whole home before you know it.

Reliable

For over 50 years Brivis has been heating and cooling Australian homes. Unmatched for reliability, some of our first heaters are still working today.

Efficient

Brivis pioneered energy efficient Ducted Gas Heating. To complement a full range of 3, 4 and 5 star heaters you can now save up to 30% on your next energy bill with the StarPro 6 Ducted Gas Heater.

Brivis – Australia's leading climate system

A reputation for innovation, reliability and quality for over 50 years has led to Brivis being recognised as the staple of Ducted Gas Heating in Australian homes.

Every Brivis heater is tailor made for the Australian winter and is guaranteed to provide your home with warm, cosy air for many years. Our design and manufacturing process is accredited to the Australian Standard AS/NZS ISO9001. And our Ducted Gas Heaters come with warranties of up to 10 years.

In addition to producing world-class home climate systems, Brivis also operates a National Customer Care Centre. Open 6 days a week, our knowledgeable staff are on hand to ensure total enjoyment of your new Brivis Ducted Gas Heater.

Ducted Heating

Brivis Ducted Gas Heating comprises a heating unit connected to a series of outlets via a system of ducts. The outlets & ducts are strategically placed throughout your home, either in the floor or ceiling. The position of the heating unit depends on your house.

The ducts which connect the outlets to the heating unit are neatly tucked away out of sight. A wall controller lets you set up your temperature for the whole home or even down to a single room.

How does Ducted Heating work?

The Brivis Ducted Gas Heating system draws air from inside your home through the heater where it is warmed. A fan pushes it into the rooms of your home via the outlets and duct network, in the form of a steady, gentle supply of warm air.

The Brivis controller monitors the air temperature on a continual basis and controls the Brivis Ducted Gas Heating system to ensure a consistently warm temperature throughout the home. On our higher efficiency models, as the home heats up, the heater modulates the gas so only a small amount of energy is used to keep the space at your desired comfort level.

Once your home reaches your desired temperature the heater unit switches off. The fan then comes to a halt slowly, ensuring that all the remaining heat inside the unit is used.

Brivis Performance Guarantee

Expert design and installation of comfort systems is essential in ensuring optimum operation and maximum performance.

The unique Brivisize™ software enables designers, in consultation with you, to accurately select the perfect Brivis appliance for your home.

After using the guide and having your Brivis product correctly installed and commissioned by a licensed professional, if the Brivis unit does not perform as it was designed to do, Brivis will repair or replace the Brivis appliance free of charge, or refund your money.

The more stars, the more you save

Star ratings explained

The star rating on your Ducted Gas Heater helps you compare how much gas your heater is actually using. It's an indicative guide that outlines the running cost of the heater in terms of annual energy usage.

The higher the star rating, the more energy efficient the heater is - meaning bigger annual savings on your running costs. On average, an increase of one star means energy usage savings of approximately 10 percent.

Lowest running costs

StarPro 6 Star Series

Introducing Brivis' highest efficiency Ducted Gas Heater, the SP6 series. The new range of Brivis 6 Star heaters is cleverly engineered to use less gas than traditional Ducted Gas Heaters. This is achieved through Quattra™ technology, a superior 4 Pass Heat Exchanger with Modulating Gas Valve - meaning you get superior temperature control and greater efficiency.

Add Brivis ZonePlus™ and your 6 Star gas heater is zone ready for up to four zones, allowing you to set different temperatures in each zone, or to turn off the zones you are not using, saving you money on your running costs. With Brivis ICE™ compatibility, your 6 Star heater can be

your ultimate gas heating and refrigerated cooling solution all year round, thanks to Brivis DualComfort™ technology. Selected models are also available in Universal Liquefied Petroleum Gas (ULPG).

Features

- Highest possible gas energy rating
- Reduced running costs
- Reduced carbon emissions
- Brivis ICE™ compatible
- Brivis ZonePlus™ compatible
- Selected models available in ULPG
- Lay down kit (internal unit option)
- Five year parts and labour

Save 30% annually compared to a standard 3 Star Ducted Gas Heater

[#]Energy savings are compared to a standard 3.0 star Ducted Gas Heater. Running Cost Data is based on Australian Standard AS4556-2011. House Heat Load 0.2MJ/HR/m3 and 600 Hours of operation (100 days at 6 hours per day). Annual Energy Consumption - as per AGA Star Ratings for Ducted Gas Heating Systems. Gas Price = 1.6 cents per MJ/HR). Savings based on Average House Floor Area for New Homes built in 2012 - 2013*, with 2.4m ceiling. Actual savings may vary due to variations in factors such as fuel costs, house size, thermal insulation and heater usage patterns. * Source: Australian Property Investor, ABS, Commsec: November 2013

StarPro 4

StarPro 4 Star Series

The new and improved Brivis SP4 boasts up to an impressive 4.8 Star energy efficiency rating, making it the highest rated 4 Star Ducted Gas Heater available.

Due to its flexible installation options (universal indoor or outdoor) the SP4 series is perfect for upgrading your old Ducted Gas Heater. It is an ideal all-round gas heater that's affordable, incredibly efficient and compact.

Brivis SP4 series is also ZonePlus™ and DualComfort™ compatible.

Features

- Outstanding efficiency up to 4.8 Stars
- Universal internal/external unit
- Economical to run
- Brivis ICE™ compatible
- ZonePlus™ compatible
- Lay down kit (Internal - SP415/SP421)
- Five year parts and labour warranty

StarPro MX Series

The Brivis StarPro MX range employs most of the great features and benefits of the HX range, but at a medium efficiency range of 4.2 Stars to 4.4 Stars. Also ideal for when large air volumes are required, the MX range offers excellent performance, reliability and value for money.

35+ years of performance

Next generation Classics

Our most popular heaters

If you are one of the thousands of Australians who have enjoyed the performance and reliability of a Brivis Ducted Gas Heater, chances are you are familiar with the Classic Buffalo or Wombat. After all, there are more Brivis Classic Ducted Gas Heaters installed in Australian homes than any other brand.

With applications to suit virtually all types of homes, the Brivis two-piece Wombat range of heaters have up to 3.8 Star energy rating; making it one of the highest rated 3 Star Ducted Gas Heaters on the market - making it the best value option in its class.

The Brivis Buffalo external weatherproof units have also been reliably keeping Australians warm for over 35 years.

The Classic range also has plenty of air supply for adding a Brivis ICE™ refrigerated cooling system.

Perfect for those looking to replace their existing heater with an unrivalled dependable low-cost option, the Classic series has proven performance and a name you can trust.

Features

- Excellent value for money
- Easy changeover
- Reliable and built to last
- Superior airflow
- Five year parts and labour warranty

Reliability guaranteed on the Classic series with a 5 year warranty

Compact Classic Series

With the new Classics hot off the factory floor, the CC3 Compact Classic range, as the name suggests, is a compact design for easy installation indoors and in tight spaces. Perfect for new homes, the CC3 is a price conscious, no fuss solution that's easy to install.

Features

- Excellent value for money
- Three speed fan
- Up to 3.5 star rating
- Low profile, compact and splittable
- Three year parts and labour warranty

Buffalo 5 Star

The new Brivis Buffalo 5 Star Classic Heater has been designed with efficiency and reliability in mind. The perfect solution for replacing your existing Buffalo, the Buffalo 5 has the same gas pipe connection, flue position, base dimensions, electrical connection and base box - almost identical to its predecessor, but with an all new 5 Star Energy Rating. Plus, with savings of \$331* on annual running costs compared to a standard Buffalo, the Buffalo 5 is a simple upgrade choice.

Your investment in the Buffalo 5 is sure to provide you many years of trouble-free, high-efficiency comfort, as well as reduced gas consumption.

Take a closer look

Multispeed Combustion Fan**
Automatically adjusts the combustion air through the heat exchanger for maximum efficiency.

Guardian™
Sophisticated multi level safety controls that meet or exceed Australian Standards for supreme peace of mind.

Electro-Nite™
Electronic start ensures no wasted gas (pilot light) when not operating. Most reliable form of ignition.

Modulating Gas Valve*
Helps maintain a more even temperature in your home for ultimate comfort.

Zero Chill™
Soft start fan eliminates cold drafts on startup.

Cool Touch™
Twin skin and fully insulated cabinets keep the heat where it is needed inside your home and not wasted outside.

Engineered for total comfort

Brivis has been providing heating and cooling solutions to Australian homes for over 50 years. Our local manufacturing facility, located in Braeside Victoria, employs over 200 dedicated people and is home to some of Australia's most innovative heating and cooling products.

Brivis pioneered the very first 5 star Ducted Gas Heater and has been instrumental in introducing some of the newest and most efficient systems in Australia - including the Contour Evaporative Cooler and the new 6 star Ducted Gas Heater with Quattra™ technology. In fact, some of our very first gas heaters are still in operation today, nearly 50 years on. That's why Brivis has been benchmarked for their excellence in engineering.

Customair™
Adjustable air volume of up to 16 Fan Speed settings to better match airflow to your home.

Quattra™***
4-Pass Heat Exchanger for absolute maximum efficiency and minimal gas usage, utilising stainless steel, aluminised & non-corrosive materials where you need it most.

Rapid Heat™*
Boost mode for cold starts to warm your home rapidly. Feel cosy fast.

We're at your Service

The Brivis National Customer Care Centre provides first class service and maintenance of your system, ensuring it's running at its highest efficiency – so you can enjoy the Brivis experience for many years to come.

Operating 6 days a week, 7:30am to 6:00pm, Monday to Friday and 9:00am to 1:00pm Saturday.

Climate

With ZonePlus™, choose your climate for any room in the house, from anywhere in the house. You have the flexibility to cater to everyone's ideal climate level anytime of the day.

Control

ZonePlus™ allows total control of all zones in your home no matter where you are. Control different climate levels in different zones, optimise heating up and cooling down times, have total control of your comfort and energy use. Even switch zones off. You're in control.

Comfort

Everyone's comfort levels are different and ZonePlus™ has taken this on board. No matter what your comfort level is, each zone is completely within your control. Bravis Networkers in every zone allows easy management.

Introducing Bravis Zoning Solutions

1. Bravis ZonePlus™

For outstanding individual comfort, control and energy management, the Bravis ZonePlus™ allows you to have up to four individually controlled zones, each with their own time and temperature settings.

For total flexibility, you can upgrade as many Bravis Temperature Sensors to Bravis Networkers, allowing you to fully control, program and manage each zone – eliminating the need for you to go back to the Master Networker. Adjust temperatures for each zone as it suits you from any Networker in the home. Perfect comfort, absolute control.

Bravis ZonePlus™ works in unison with any Bravis StarPro Ducted Gas Heater with, 4, 5 and 6 star efficiencies. It can also operate your Bravis DualComfort™ system for the ultimate, integrated heating and cooling comfort control solution.

2. Bravis Adaptive Zoning

Allows heating or cooling to be used with one Bravis Networker, operating a common zone (i.e. the hallway), as well as up to four additional zones, e.g. lounge room, bedrooms, kitchen/dining etc.

A Bravis Networker can simply turn zones on or off to manage only those areas you are using.

Benefits of ZonePlus™

Reduce your energy costs

Switching off unused zones not only helps reach your set temperature faster, but will also save you lots on your energy bill. Adjusting your comfort levels moderately can also make big changes to your energy bill.

Save money

A large home may require, for example 20kW system to effectively heat or cool the entire home. In consultation with a dealer, you may find that you will only ever use half your rooms at any one time – hence a 10kW

system would suit. Providing a significant up-front cost saving and minimising running costs.

Get more comfortable quicker

With the option of Bravis Networkers in every zone, you no longer need to rely on one central Networker managing your entire home. Controlling your climate is only ever a few steps away. How convenient is that?

One control for total flexibility

The Bravis Networker provides you with maximum flexibility. Featuring Electro-Luminescence (EL) technology which makes it easy to read, it allows you to preset ON-OFF times, and set and forget the comfort level you desire. So smart, it even controls your Bravis cooling system.

Consult a Bravis specialist dealer to design and install a Bravis ZonePlus™ system to suit your home and lifestyle.

DualComfort™

Keep your energy costs to a minimum

The combination of Ducted Gas Heating with refrigerative cooling provides a superior whole home climate control solution at an affordable rate.

The ultimate form of air-conditioning

The system combines the best form of heating and the best form of cooling. It can be zoned, utilises common ductwork and allows you to maintain your desired level of comfort all year.

Better performance in cold ambient temperatures

When the outside temperature drops close to zero the Ducted Gas Heater of the DualComfort™ heating and cooling solution outperforms electric reverse cycle systems. In colder weather, gas heating is more effective and more comfortable, as the heat output of gas appliances is not affected by low ambient temperatures, which is the case with reverse cycle systems.

Considering cooling? You should read this.

The Brivis StarPro series of Ducted Gas Heaters provide the flexibility to integrate a Brivis ICE™ (Integrated Cooling Equipment) refrigerated system, all while using the exact same ductwork and grilles - saving you both time and money. We call this technology, Brivis DualComfort™.

The Brivis DualComfort™ whole of home Ducted Gas Heating and refrigerative cooling solution allows you to create that perfect feeling of

comfort throughout your home. DualComfort™ provides both refreshing, refrigerated cooling, or comfy gas heating. The technologies used in the DualComfort™ heating and cooling solution combines a StarPro series Ducted Gas Heater with Brivis ICE™ and a Networker controller - and are a culmination of 50 years of Brivis heating and cooling experience in Australia.

DualComfort™ product features

- ZonePlus™ compatible (StarPro only)
- Advanced control options
- Australian designed, locally made for more than 50 years
- Brivis ICE™ Add-On refrigerated cooling system
- Electronic ignition and integrated diagnostics
- Duct work installation flexibility (under floor or in roof space)
- Heating and cooling from the one controller

Flexible installation options

With the DualComfort™ heating and cooling solution you can install both the gas heating and refrigerated cooling at the same time, or install just the heating first, ready for the cooling to be added in at a later date. Simple.

Ask your installer about being Brivis ICE™ ready

What makes DualComfort™ ducted air conditioning so attractive?

- Fully integrated gas heating and Brivis ICE™ refrigerated cooling system. The best of both worlds
- Staggered installation options allowing you to install heating first and cooling later, lowering your initial upfront cost
- Common ductwork and grilles for both heating and cooling to rooms, meaning low cost installation
- Flexibility to customise system for whole-of-home or zoned heating and cooling, meaning lower running cost
- Brivis NC-6 Networker controller has built in zoning functionality which is simple and easy to use

When installing a Brivis ICE™ Add-on refrigerated cooling system to an existing Ducted Gas Heating system, care must be taken to ensure the duct system is sized and designed correctly. If you are installing a heating system and plan to install Brivis ICE™ Add-on refrigerated cooling system at a later date, then ensure that you advise your dealer and they will size the system accordingly.

Brivis ICE™

Controllers

Specifications

The Bravis Networker

The Bravis Networker Controller can operate in either auto or manual modes. In manual mode, you set your own temperature, then leave the rest to the Networker. It will maintain the temperature you have chosen, until you choose to turn it off. In auto mode the Networker allows you to preset temperatures and times to turn the system on and off. This means that you can wake up to a nice warm house in winter.

The Networker is designed with an easy-to-use rotary dial, an easy-to-read LCD screen and is backlit using Electro-Luminescence (EL) technology, making the screen easier to read in poorly lit areas or at night. Two Networkers can be used together to provide enhanced temperature control.* During warmer weather the Networker can be used to operate a Bravis cooling system.

Whether in heating or cooling mode, the Networker can be programmed to turn off after you've gone to sleep giving you comfortable sleeping conditions.

Programmable Controller

The Programmable Controller can operate in either auto or manual modes. To program you simply preset temperatures and times for the heating/cooling system to turn on and off. This Controller is suitable for Bravis ICE™ system with the Classic Heater Range.

Networker Features

- Electro- Luminescence (EL) technology
- Large on-screen icons
- LCD backlit display screen
- Temperature dial
- Preset ON-OFF times
- On board diagnostics

Sensor Features

- Slimline
- Discrete
- Non Volatile Memory

Manual Controller

The Manual Controller is a simple to use heating only thermostat with a large easy to read digital display.
